DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed March 15, 2004 is acknowledged. See enclosed IDS form.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6 and 7 of U.S. Patent No. 6,685,223. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 6 and 7 of the patent include each of the limitations of claim 1 of the application.

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v.*

Art Unit: 3616

Eagle Mfg. Co., 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 2 and 3 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 6 and 7 of prior U.S. Patent No. 6,685,223. This is a double patenting rejection.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lohr (3,711,115) in view of Kirchoff et al. (3,972,545).

Lohr discloses a method of inflating an airbag comprising the steps of igniting a gas generant (13, 15) to form combustion products (34); humidifying the combustion products to form humidified combustion products (40; see column 7, lines 60-65; column 10, lines 14-24); and routing the products to the airbag (60)

Lohr fails to show filtering the combustion products.

Kirchoff teaches igniting a gas generant (18; column 2, lines 59-64) and filtering the combustion products (22, 24; column 3, lines 9-20) prior to other treatment (26, etc.)

Art Unit: 3616

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Lohr with the teachings of Kirchoff to filter the combustion products in order to prevent clogging of the humidifying chamber.
